Subject: MOU Draft

7559 '99 JUL 23 P4:14

I absolutely DO NOT SUPPORT restricting the availability of compounded medications from specialized pharmacies. I was not able to get help for PMS or menopausal symptoms until I found such pharmacies. The prescription drugs were not natural and were toxic to my body.

This will compromise the quality of my life.

This is the Draft MOU being proposed by the FDA. This is docket No.

98-N-1265.

This should be my choice to use the products as I and my doctor determine is best for me. I strongly object to government intervention in such a personal matter.

Thank you. Wendy Bedenbaugh
